

Ilodino is a lovely management simulation game with dinosaurs! Thanks to the wonders of science, it is now possible to revive all these legendary giant creatures that once populated our planet earth.

This zoo is a bit special as the player will have to build, develop and manage this fantastic theme park!

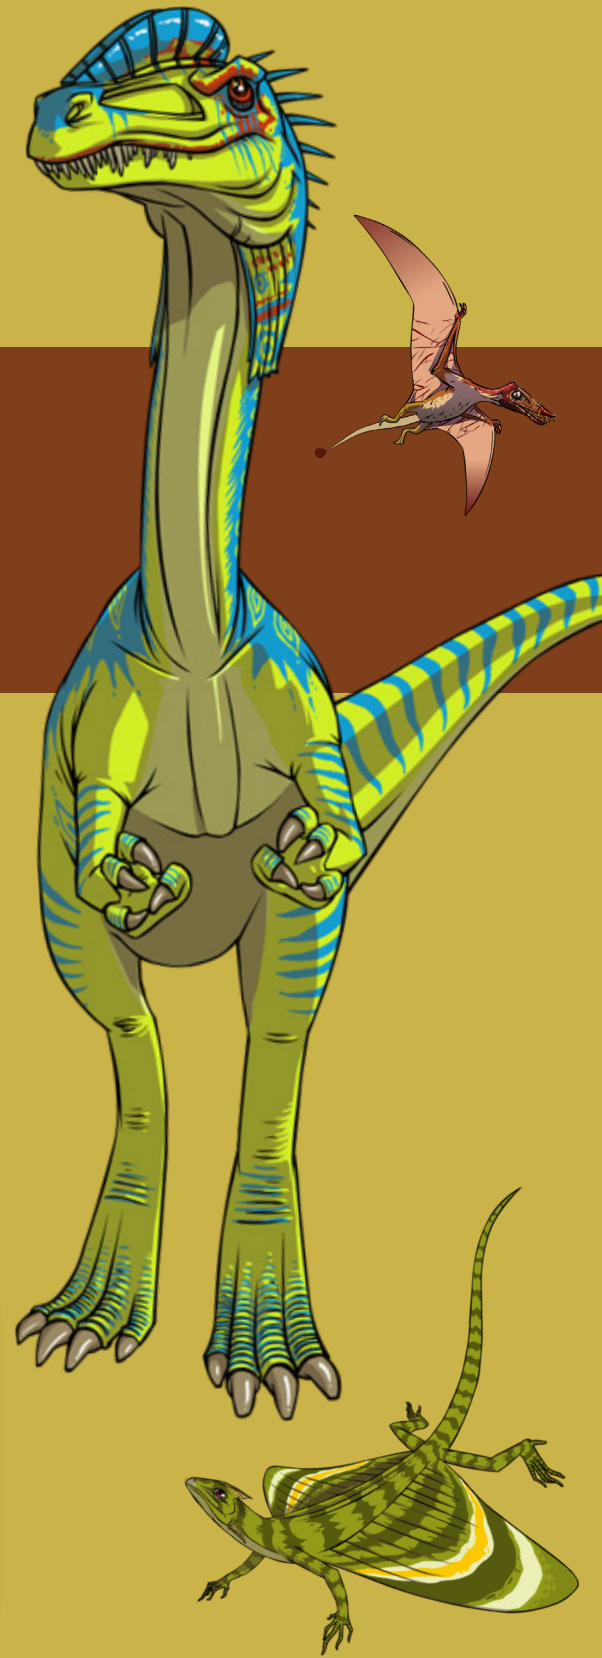

## MANAGEMENT AND BREEDING

The player will be able to choose amongst several hundred breeds of dinosaurs. He must ensure that every species settles in the right environment, this is necessary if you wish to get some baby dinos, thus attracting more tourists to your park!

The player can also be a little more ambitious and collaborate with other players to develop bigger projects. He can also enter a guild and get a job collecting important resources in different parts of the globe for the guild and the theme park

## KEY FEATURES

- ◆ **Management simulation with dinosaurs**
- ◆ **Hundreds of dinosaurs for your park**
- ◆ **Hundreds of decorations and choices of construction**
